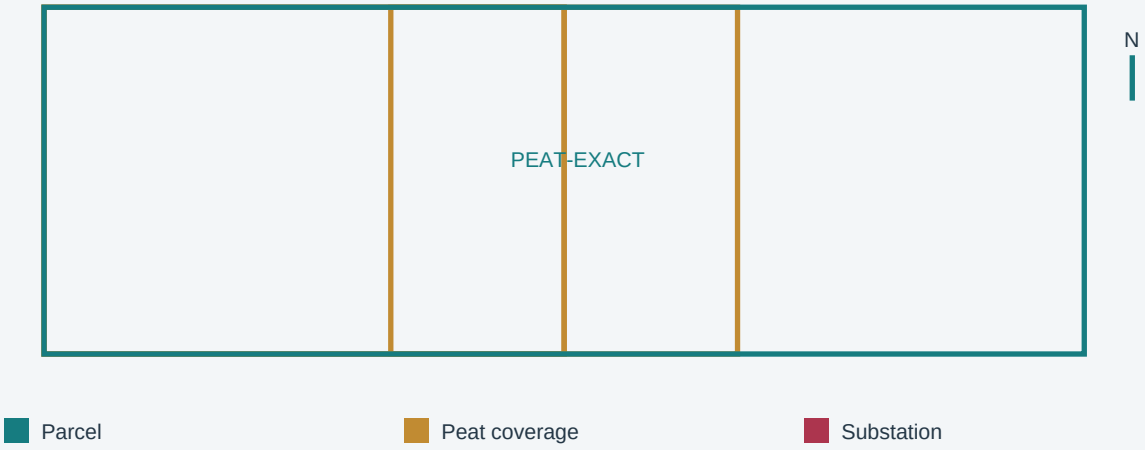
Peatland prospecting report

DE / PEAT-EXACT

SYNTHETIC DEMONSTRATION DATA - no real site or ownership claim

Parcel area	30,000.00 m2 / 3.0000 ha
Parcel source date	2026-01-15
Deduplicated peat overlap	20,000.00 m2 (66.67%)
Indicative eco-points	160,000
Qualifying rule	Parcel >= 3 ha; positive peat overlap; 8 eco-points/m2 of overlap

EPSG:25832 | schematic in grid metres | north up



Synthetic geometry; overlapping peat outlines are unioned for calculations.

Why this candidate qualifies

All inclusive screening thresholds shown above are satisfied. Candidate selection is ordered by country and parcel identifier. Peat coverage is unioned before intersection with the parcel; repeated coverage adds no area.

Calculations and source evidence

Rule: iris-screening-1.0 | Run: 915f80e1-01e8-4ef4-b734-791d783b0ff3

Union peat, intersect parcel, measure: 20000 m2. Overlap / parcel x 100 = 66.666667%. Eco-points: 20000 x 8 = 160000.

Assumptions and unverified attributes

Internal IRIS specifications unavailable; contracts in README are local assumptions.

EPSG:25832 (ETRS89 / UTM zone 32N), planar grid metres; suitable only for this pilot region.

Geometry types: polygon/multipolygon for parcels and peat; point for substations. No geometry repair performed.

Unknown source-date flag for candidate: False. Source accuracy and completeness are unverified.

Ownership, planning, grid capacity, connection permission, environmental eligibility and transferability are unverified.

Manifest in this output directory records input/output SHA-256 checksums, all validation evidence and candidate measurements.

Required uncertainty statement

Preliminary prospecting material. Figures, eco-point estimates and site suitability are indicative and based on available source data and commercial screening assumptions. The 8 eco-points/m2 factor is the current commercial baseline, not certified compensation. Ownership, planning, grid capacity, environmental eligibility and transferability remain subject to project-specific verification. No permit, reservation or construction readiness is represented.
